<http://www.le-notre.org>

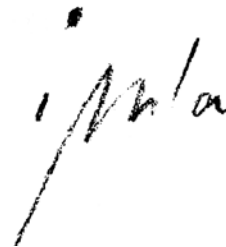

+

IMLA programme

this course is part of our curriculum

<http://www.imla-campus.eu>

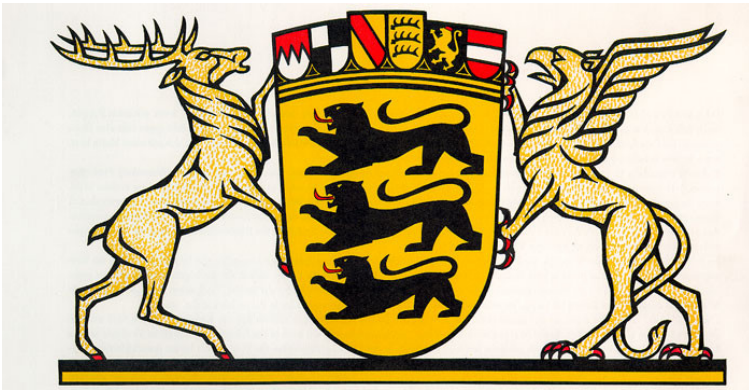

HOCHSCHULE
WEIHENSTEPHAN-TRIESDORF
UNIVERSITY OF APPLIED SCIENCES

Seminar Background

...and special thanks to the State of Baden-Württemberg

For supporting the development of additional learning materials

- Glossary
- Case Studies
- Video materialswill be made available during this seminar

Seminar Participants from Europe and beyond

- we received **200** registrations
- **80** of those are active participants
- primarily from Europe but also beyond
- includes some doctoral students and professionals
- **+ 20** students from the IMLA programme

....let's have a look at our map

Distribution of Seminar Participants

Add your location:

<https://www.zeemaps.com/map?group=1174493&location=Europe&add=1>

Seminar Learning Objectives

- 1** to **understand** the scope and core concepts of green infrastructure
- 2** to **know** different approaches to green infrastructure
- 3** To **imagine** an experimental design for a specific case in your environment
- 4** To develop ideas in an **intercultural** group

Seminar Sequence

A Define your case study area

B Present your case (description + analysis)

C Imagine an alternative future

Invited Speaker

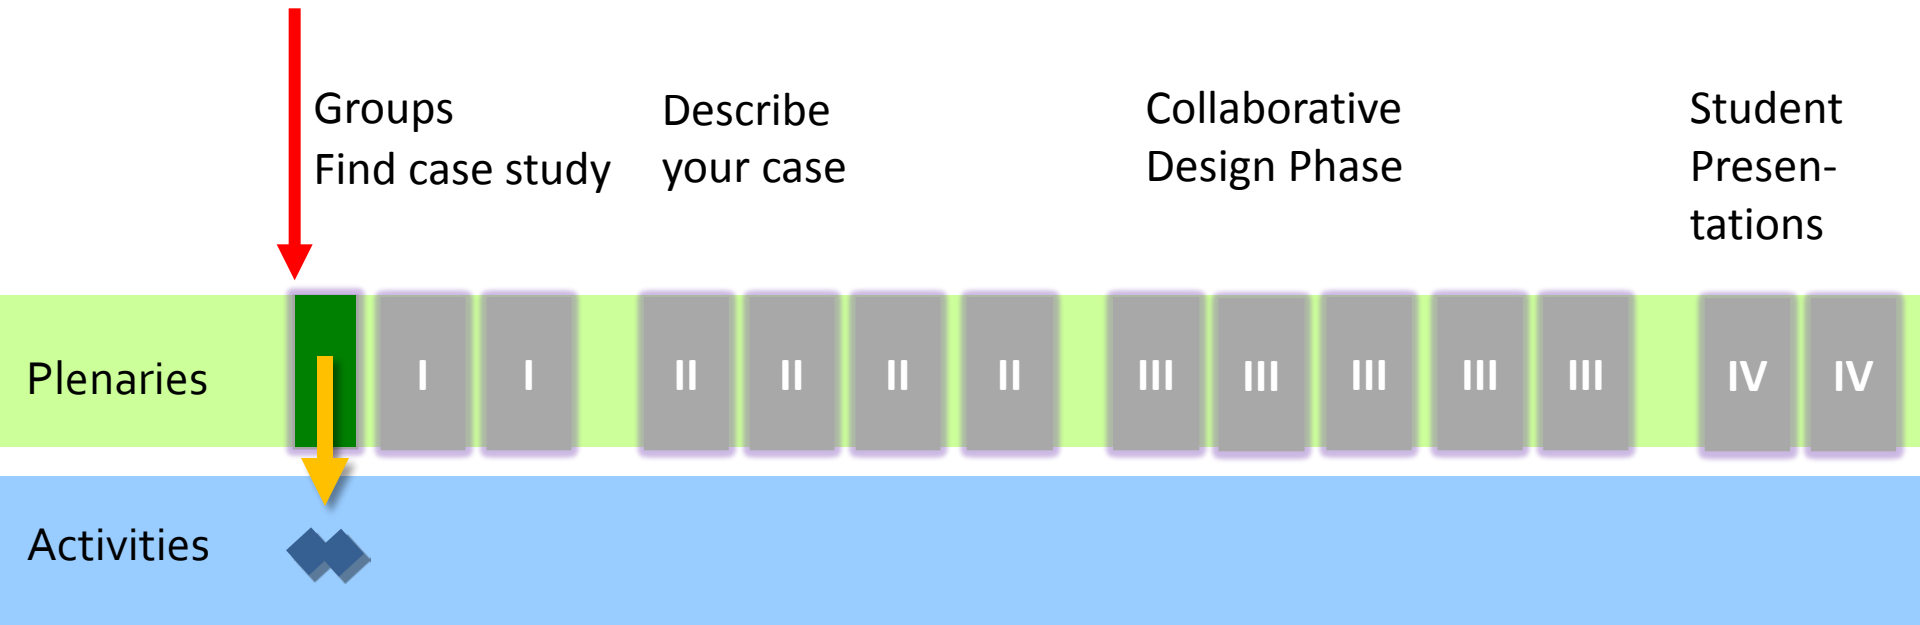

Exploring the potential of green infrastructure

Peter Wilder, landscape architect

Wilder Associates, London, UK

Seminar Process and Assignments

We are here today

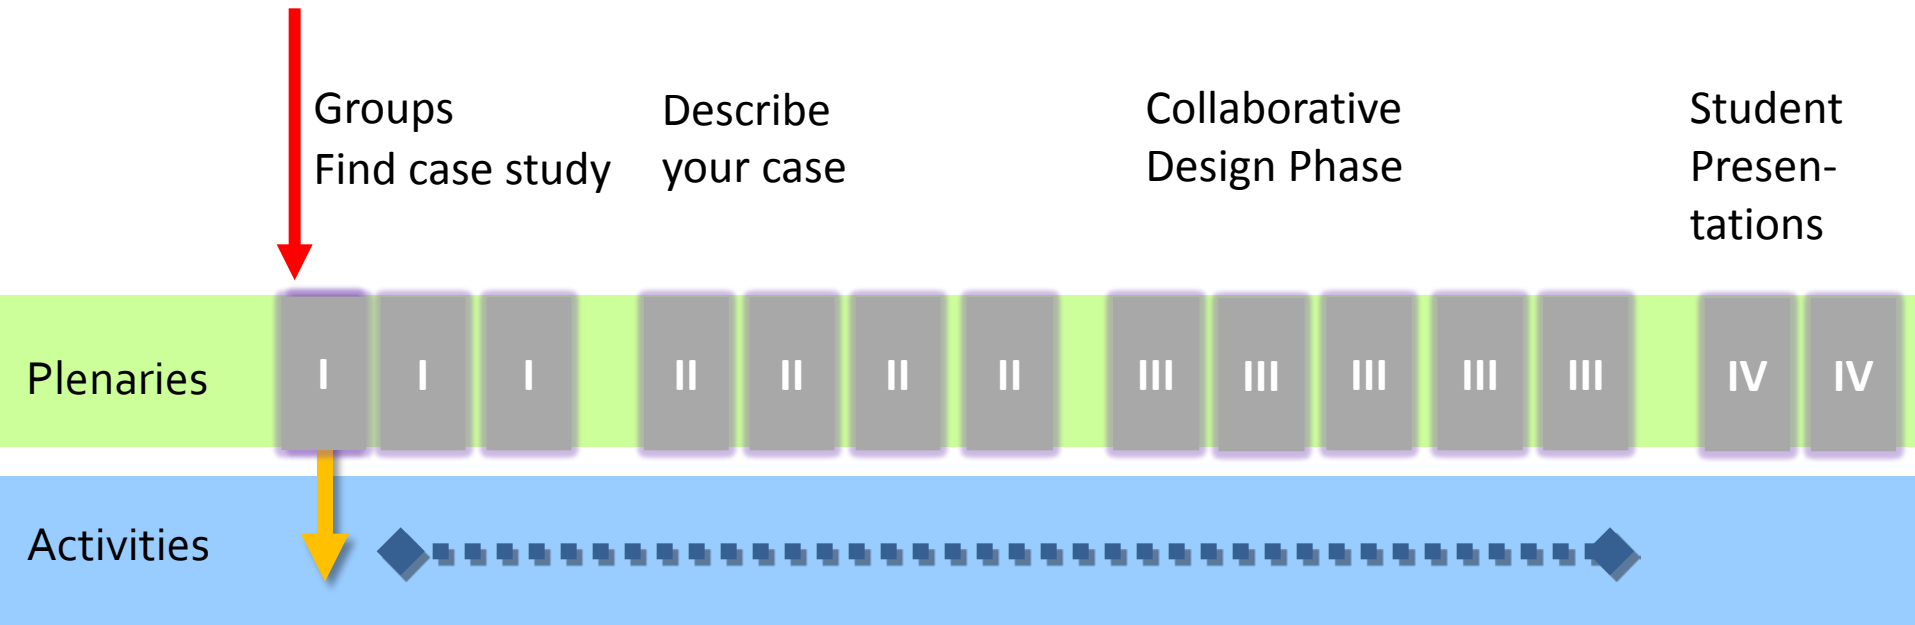

1 Assignment 1: Initial Concept Mapping >> **October 28 → done?**

Please submit missing maps!

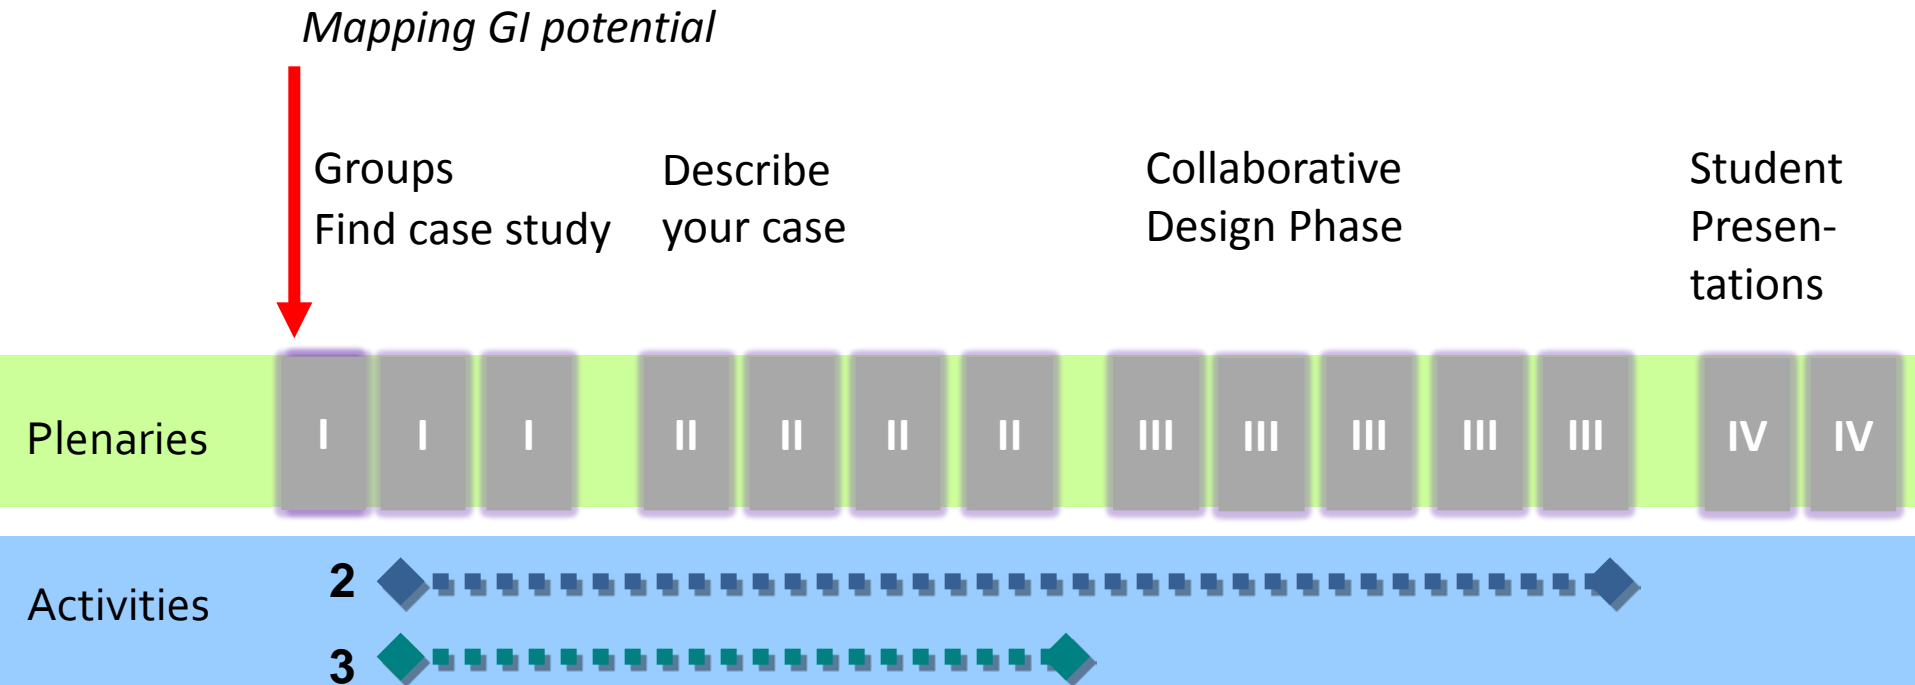

Seminar Process and Assignments

We are here today

- 2 Assignment 2: Concept Mapping of Seminar Topics >> **Starts Today (Oct 28)****
 - Seminar coordinators will form groups of four
 - Lectures will be distributed, reflect in from of concept maps and discussions

Seminar Process and Assignments

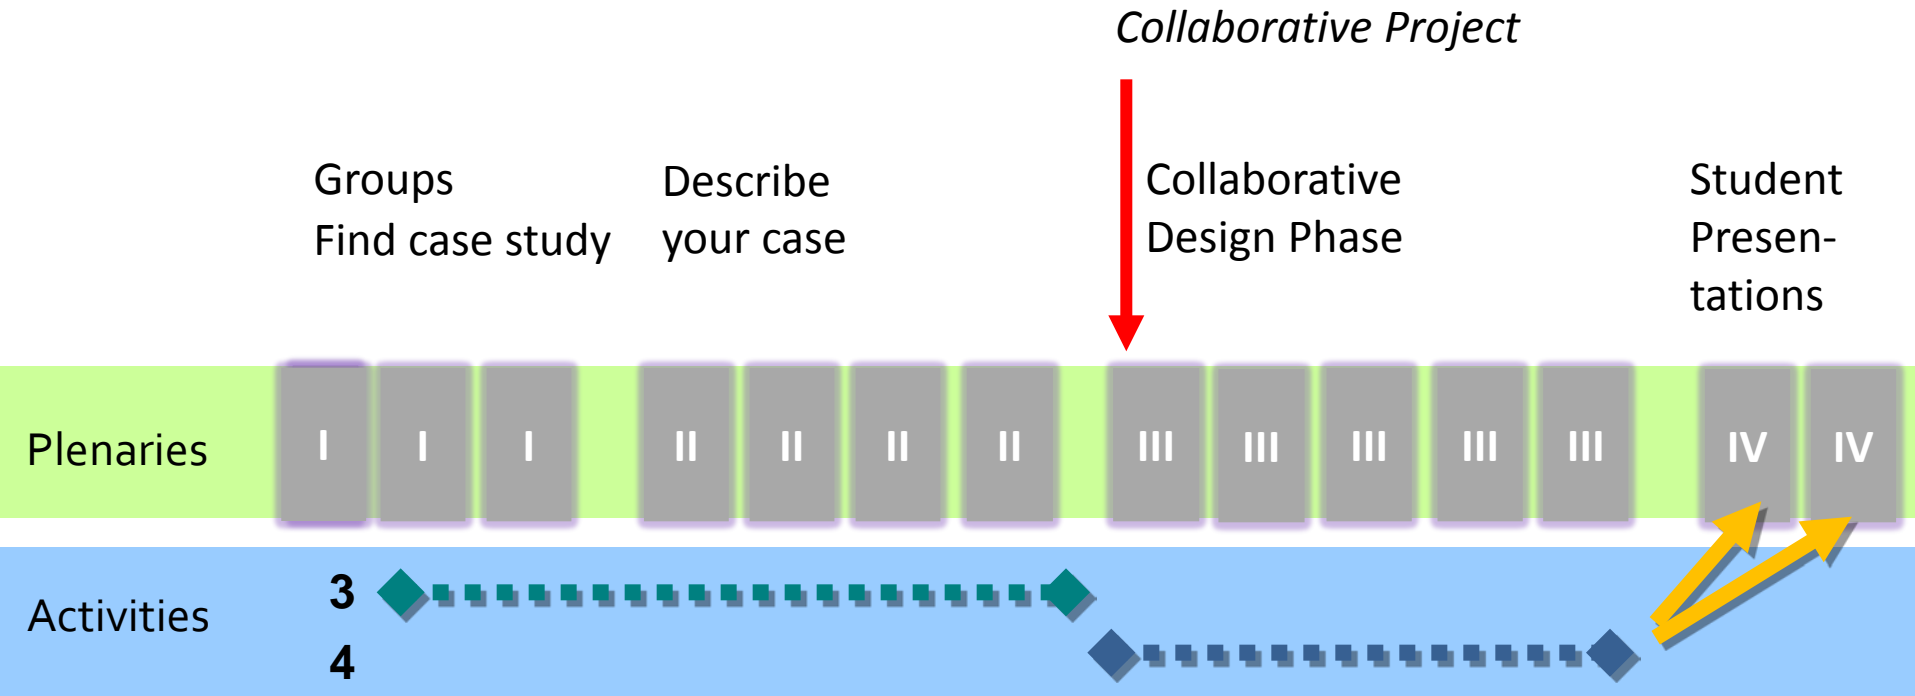

3 Assignment 3: Green infrastructure potential in your environment >> **Starts October 28**

→ groups of four prepare and present one case each

→ basis for collaborative design

Seminar Process and Assignments

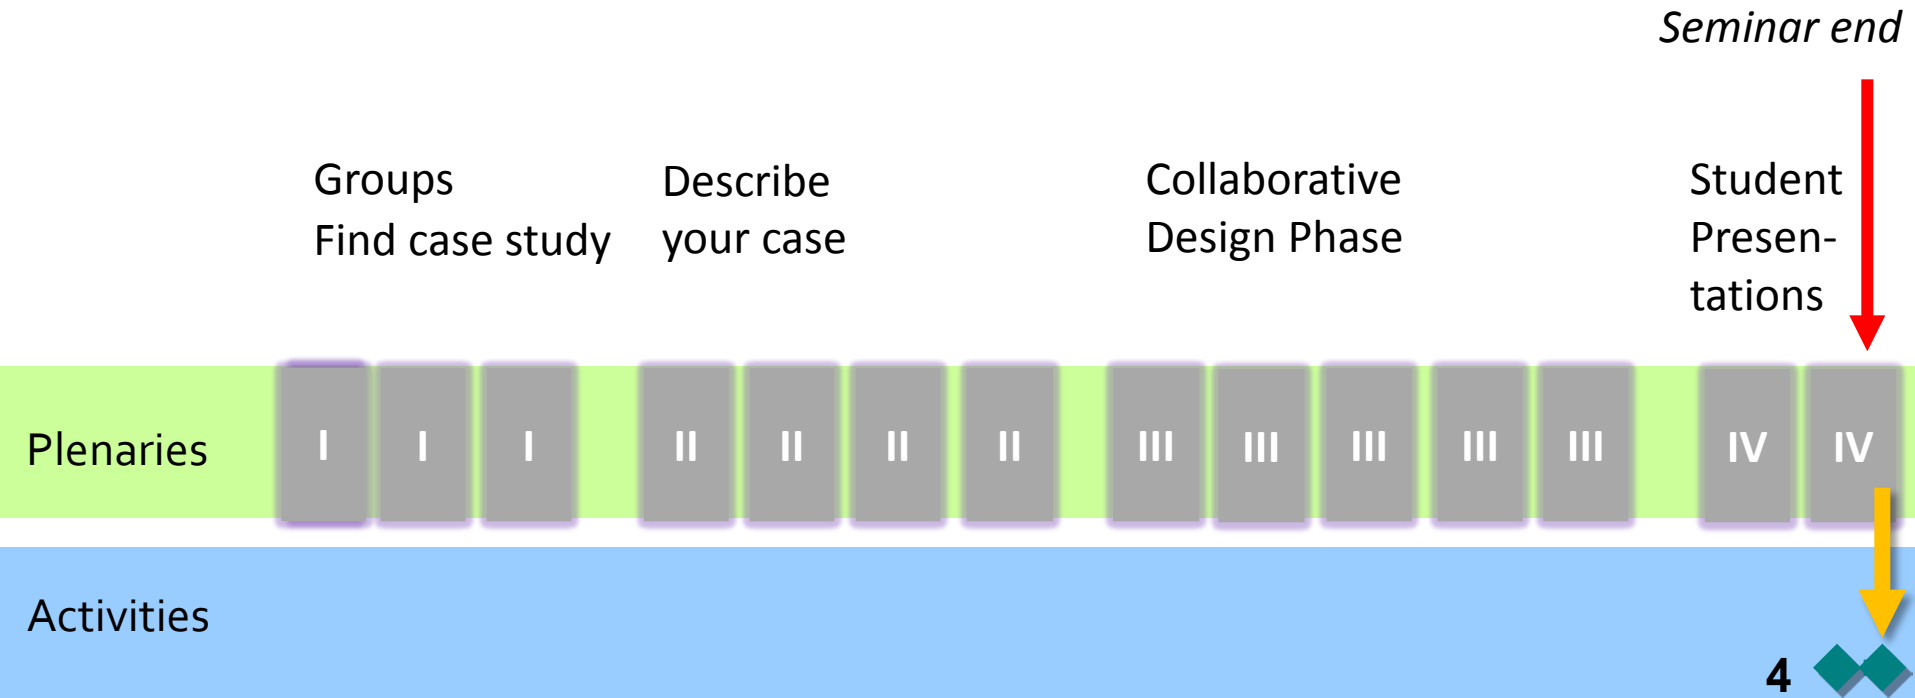

4 Assignment 4: Collaborative design >> **Starts December 2**

→ groups of four decide on one case

→ basis for collaborative design

Seminar Process and Assignments

- 5** **Assignment 5:** Post-seminar concept mapping >> **January 27**
→ please update /rework your initial concept maps

Steps until the next session on November 4:

1. You will get registered on the WIKI
2. get in touch with your group partners
3. think about your case area

→ more information per e-mail

Any questions?

Next session

~~Wednesday~~, November 04, 2014

Lecture + discussion with

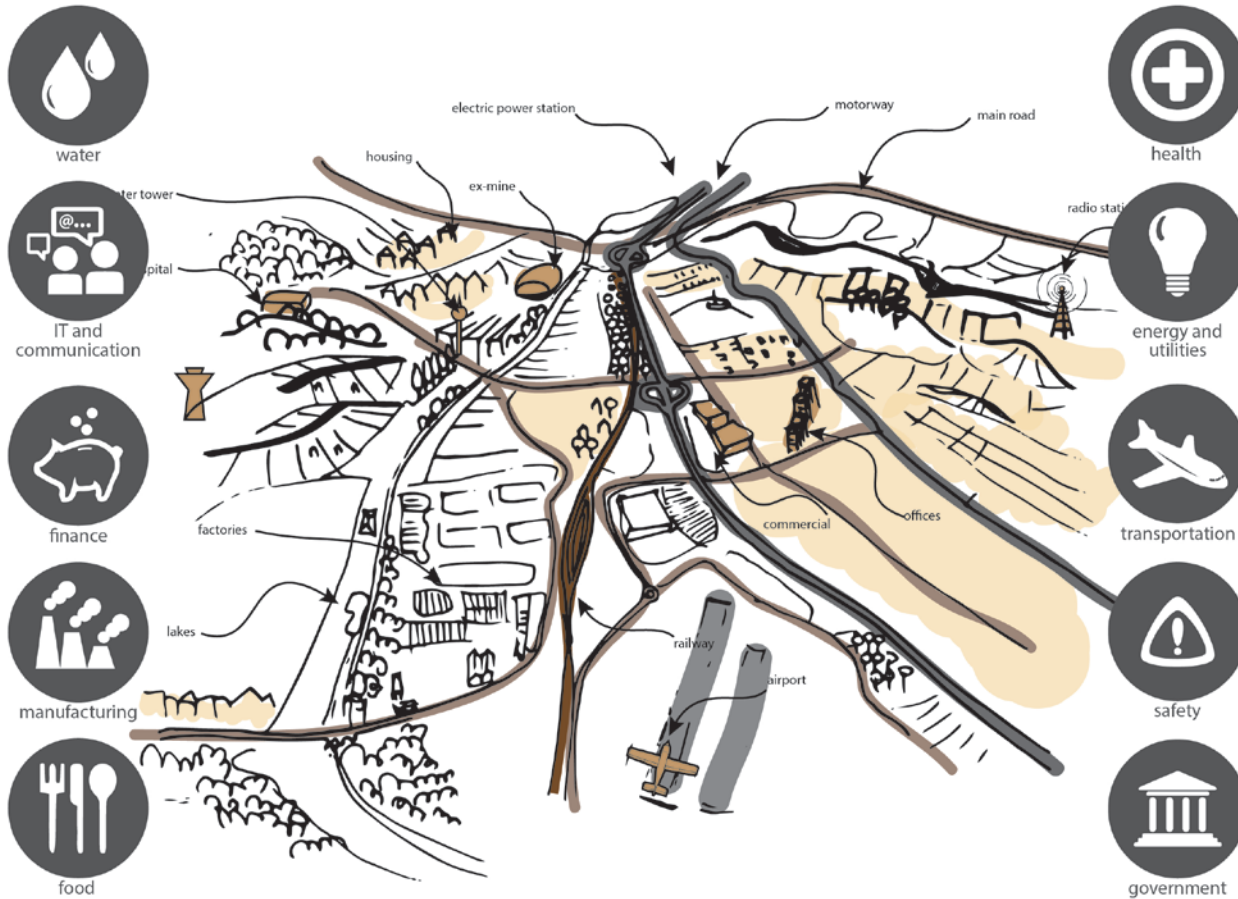

Dr. Ian Mell

University of Liverpool, Department of Geography and Planning

Green Infrastructure:

concepts, perceptions and its use in planning

See and hear you again next Tuesday!

towards no more-----grey infrastructure (visual by Anna Szilayi-Nagy)
