

Sunday, 10th of September 2017, University of Greenwich, London
Venue: Department of Architecture & Landscape, **room to be specified**

ECLAS Doctoral Colloquium

10 00 **Welcome and round of introductions, warm-up**
Ellen Fetzer, ECLAS, and Benz Kotzen on behalf of the host university

10 30 **Interactive Poster Session**
This colloquium is addressed to both current/prospective doctoral students and senior researchers who are supervising thesis processes. It may also be of interest for prospective supervisors who wish to learn from peers about tutoring methods in this field. The overall objective is to share and discuss methodological aspects within the European landscape architecture research community. The meeting is open to any research theme and methodological approach in the wider context of landscape architecture.

Doctoral students are invited to submit posters by 31.08.2017

Poster templates are downloadable from:

<https://eclas2017london.com/conference/doctoral-colloquium>

12 30 **lunch break**

Round Table *Research by Designing*

14 00 **Round table moderation:**
Mick Abbott, Lincoln University, NZ, **Steffen Nijhuis**, TU Delft, NL and
Paul Roncken, Wageningen University, NL

The place of design in research is a recurring focus for landscape architecture. And while the role of design in academic inquiry remains controversial in some quarters, a sense of change is apparent.

This workshop is an open invitation for researchers who are actively using design to investigate research questions and contexts. Our goal is to meet around a large table so each participant can share/present/discuss the manner of design-directed research they have completed and/or underway. The purpose of this workshop is to share relevant design research methods and to foster connections and collaboration between academics and their respective institutions.

We welcome **short presentations** of specific examples of current research by designing from your institutions to prompt a collective discussion on 'research by designing'.

Other objectives for the round table: identify opportunities for collaboration, exchanges, themed conference tracks at future ECLAS conferences and fostering postgraduate research that uses designing as a core research method.

If you are interested in contributing please send an abstract by
29.08.2017 to colloquium@eclas.org

16 00

Coffee break

16 30

Summarizing round table outcomes and outlook

To be scheduled: a short intervention by the JoLA team at some point

Meeting ends in time to attend the ECLAS welcome reception
