

Which opportunities and barriers can you identify in your country to progress towards the achievement of SDG-3 - Health and Well-Being?

39 responses

A strong barrier is a lack of education and poverty

political crisis

intensive car traffic

The political will to offer new ways to fight climate change!

policies economy

Proximity City Evidence-based reporting for Baselineing multi-sectoral approaches

opportunities: green spacebarriers: cars

Participation

researches technologies

Which opportunities and barriers can you identify in your country to progress towards the achievement of SDG-3 - Health and Well-Being?

39 responses

lost of property

Awareness and implementation on green infrastructure

To plan the city's growth according to the protection of water basins, and the usage of water basins of new public commons to improve the accessibility to natural systems from an urban approach

pros: economy, governmental policies
cons: economy, governmental policies (since these situations are changing)

Industries

Lack of access to green spaces for everyone, people ignoring hygiene, Bad sanitation infrastructure

opportunities: natural resources and places
barriers: lack of sustainable management for the resources

something can be done to increase recreation areas. and we definitely have to think about landscape not in isolation, but with concepts such as health, economy, security.

Economical Forces

Which opportunities and barriers can you identify in your country to progress towards the achievement of SDG-3 - Health and Well-Being?

39 responses

reconstruct zoning laws to prohibit single-family residential in cities, introduce mixed-use in smaller densities to minimize car dependency, and increase walkability/cycling to reach necessities

diabetes, depression, disabilities

Lack of information about NCDs as a barrier
Large green public spaces within cities as an opportunity

A barrier in my country is poverty and an opportunity is the presence of many NGOs which fight for health, education and equality.

In Barcelona
Opportunities: Green street new axis, proximity to forests.
Barriers: the bike seen as an enemy for particular vehicle.

With the high youth rate in the country, it is easy to promote new systems and get support from public.

corruption

Op.: Turkey has a universal healthcare system, ensuring access to healthcare services for its citizens. Bar.: An aging population poses challenges in addressing non-communicable diseases and costs

inclusivity

Which opportunities and barriers can you identify in your country to progress towards the achievement of SDG-3 - Health and Well-Being?

39 responses

inclusivity

bad public health system

O: Skilled healthcare professionals- Good medical education and research
B: Economic challenges- non-communicable diseases like diabetes and cancer- Environmental challenges

As there are a lot of groups of people, roles and responsibilities can be easily divided.

Politics doesn't see the sense of financing urban infrastructure and spend our money on other things

For barriers: Weak health system, Unsafe, the low income.
For opportunities: excellent doctors Well education High rate of youth

Institutional reforms

Oil

OIL

Which opportunities and barriers can you identify in your country to progress towards the achievement of SDG-3 - Health and Well-Being?
