Linking landscape education, research and innovative practice

ISOCARP
Knowledge for Better Cities

Agenda for Today

- Welcome to the CO-LAND project
- Our global agenda: the UN Sustainable Development Goals
- A voice from UN Habitat: Dr Christine Auclair
- A flashlight on the European Policy Framework
- Seminar sequence and assignments
- Question & Answers
- Introduction to the case study area
- Outlook on the upcoming session

Moderation: Ellen Fetzer (NGU) & Didier Vancutsem (ULB)

Usual session duration is 90 minutes

What is CO-LAND?

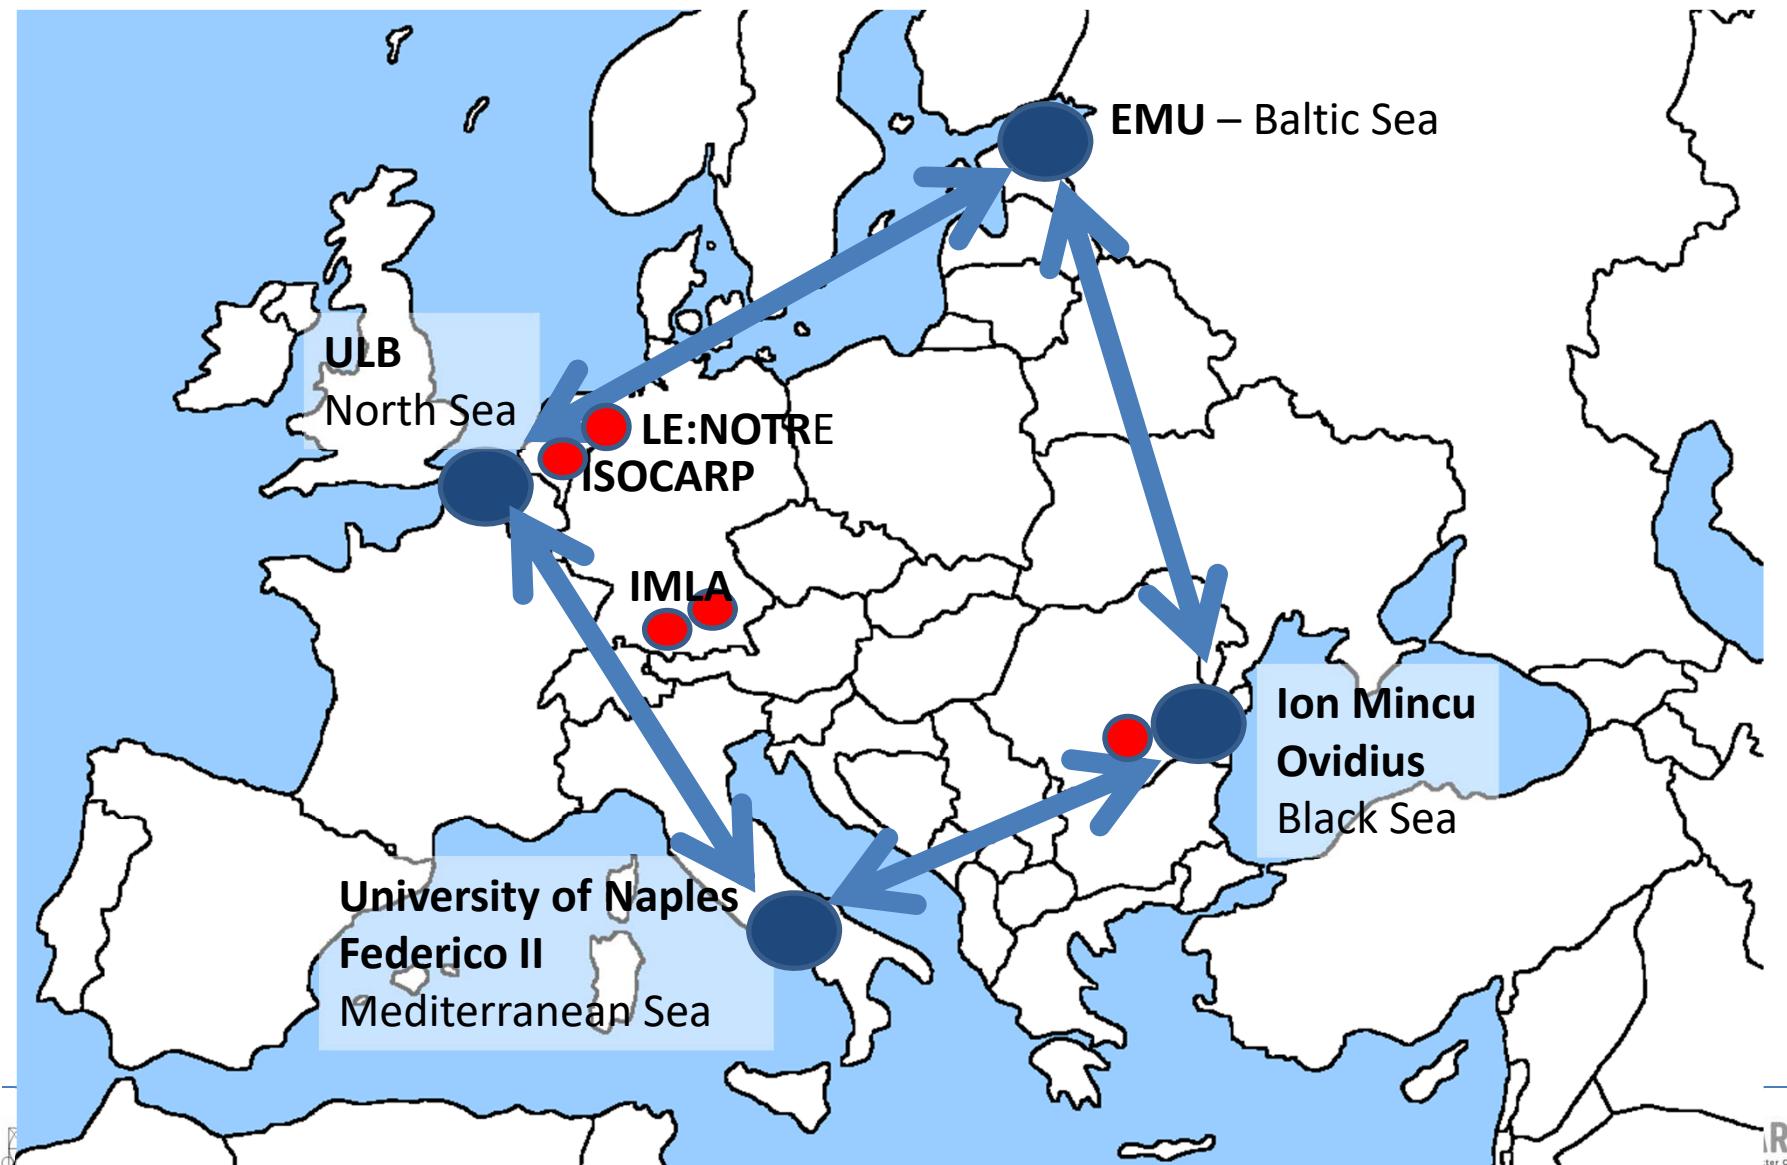

Inclusive **coastal landscapes**:

Activating green and blue infrastructure for sustainable development of the urban-land interface

An ERASMUS+ Strategic Partnership 2017-2020
coordinated by Ion Mincu University for Architecture
and Urbanism in Bucharest.

The CO-LAND Partnership

Your CO-LAND Team

COLAND Team at the second consortium meeting in Estonia, November 2018

Your motivation

Motivation of seminar participants put into word cloud

Landscapes are site-specific

...but do they also have a global agenda?

>>>*Interactive poll no 1*

17 goals to transform our world

"All countries and all stakeholders, acting in collaborative partnership, will implement this plan."
Transforming our world: the 2030 Agenda for Sustainable Development, United Nations 2015

European Key Documents in a Nutshell

-  **Marine Strategy
Maritime Spatial Planning**
-  **Strategy for more
Growth + Jobs in Coastal
+ Maritime Tourism
(DG Maritime Affairs)**

Coastal Landscapes matter because:

They are valuable living spaces for many.

This is why many land uses are competing for the same space.

View to Rione Terra near Naples, Italy, photo: Ellen Fetzer

Coastal Landscapes matter because:

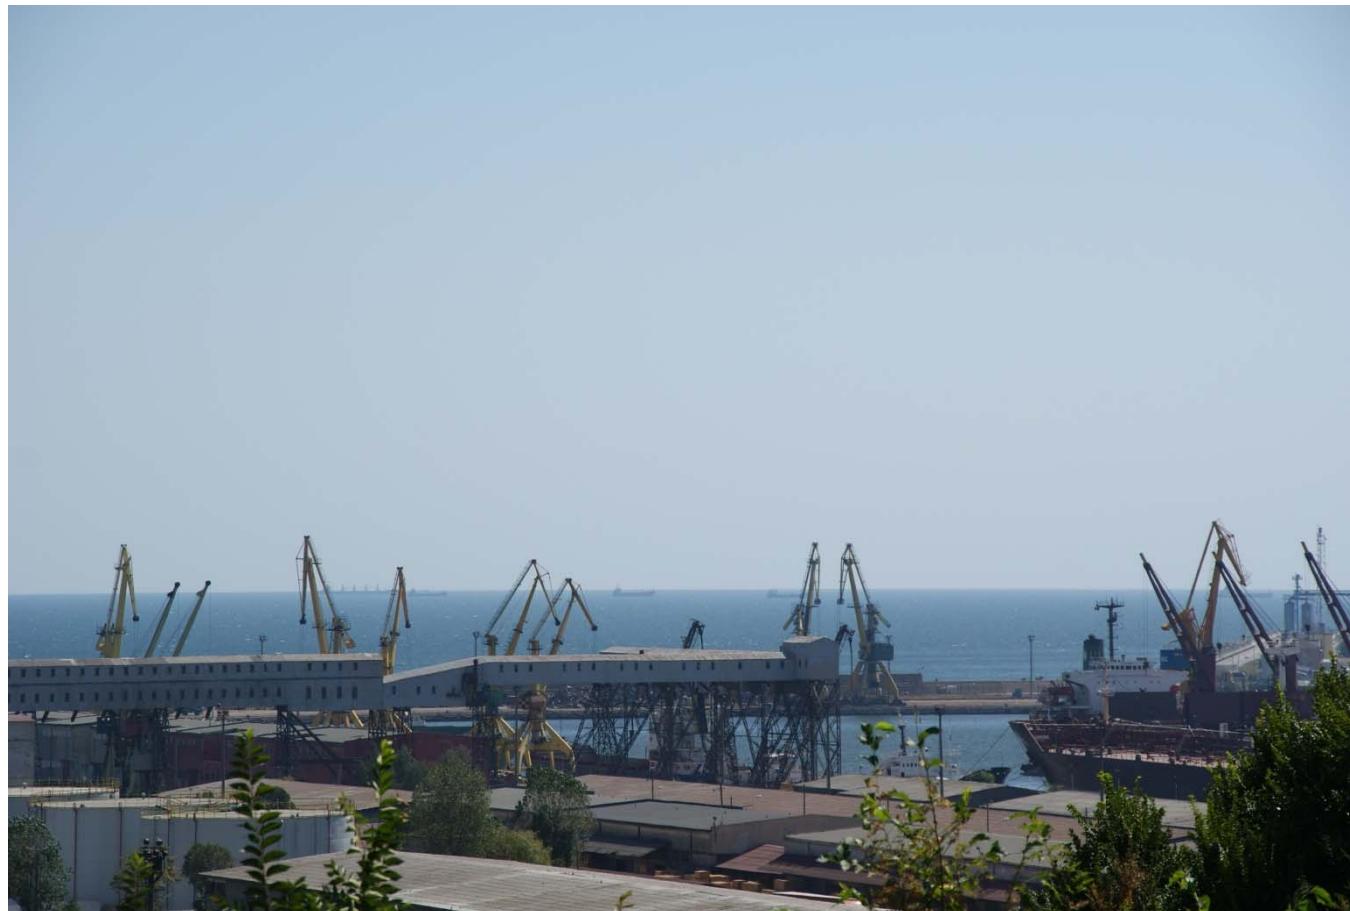

They are living landscapes under change

Pozzuoli, Italy, photo: Ellen Fetzer

Coastal Landscapes matter because:

They provide economic opportunities and generate values.

Harbour of Constanta, Romania, photo: Ellen Fetzer, 2012

Coastal Landscapes matter because:

They are biodiversity hotspots and dynamic

De Panne beach, photo: Didier Vancutsem

Coastal Landscapes matter, because

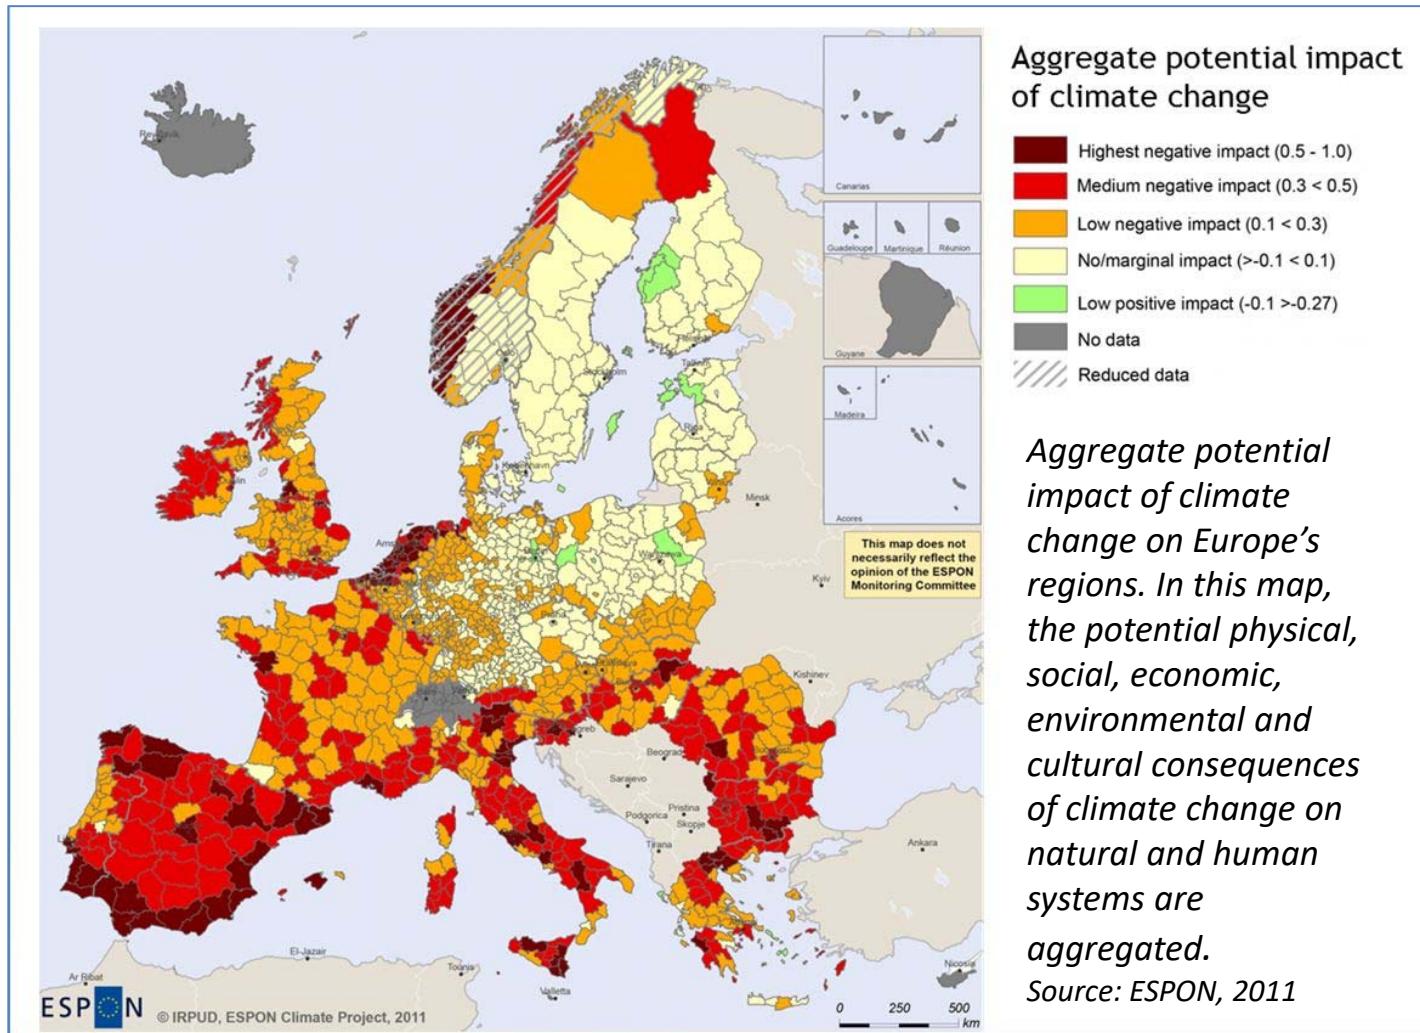

They are healthy and support human wellbeing.

Summer guests on the Mangalia beach, photo: Ellen Fetzer 2013

Coastal Landscapes are at risk

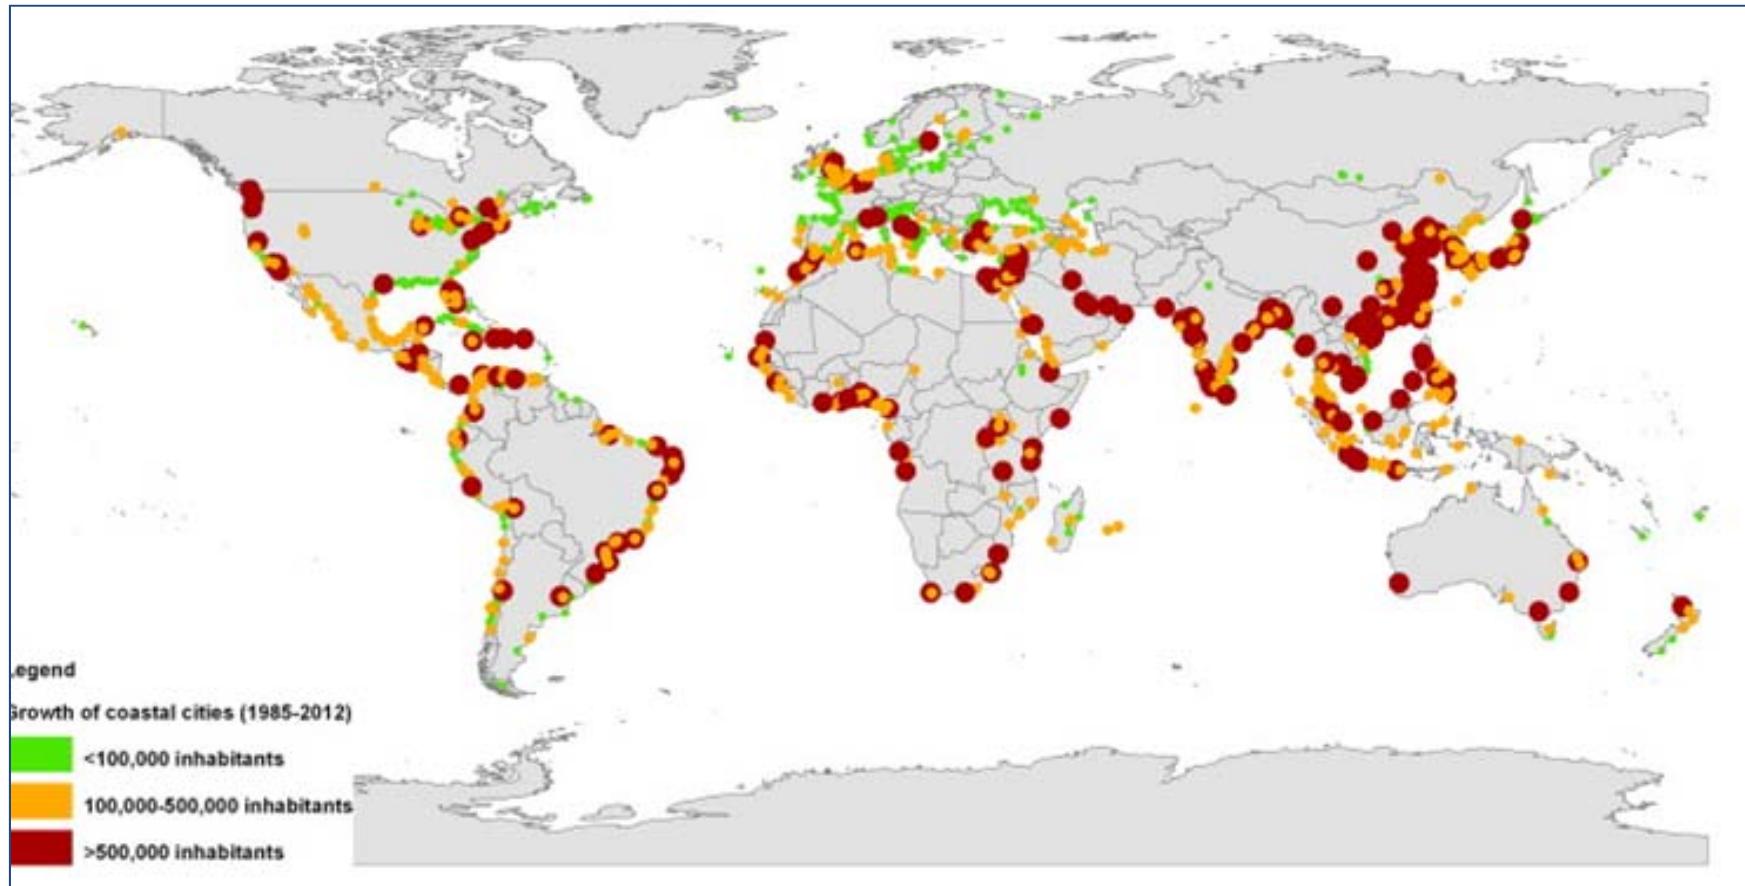

The world:...half of the population living in cities with over 100,000 inhabitants are within 100 km from the coast.

Barragan et al, 2015, Analysis and trends of the world's coastal cities and agglomerations

Growth of Coastal Cities Agglomerations between 1985 and 2012 worldwide

The increase in urban population is grouped into three ranges: Cities that have grown less than 100,000 inhabitants, cities that have grown between 100,000 and 500,000 and cities that have grown more than 500,000 inhabitants.

Barragan et al, 2015, Analysis and trends of the world's coastal cities and agglomerations

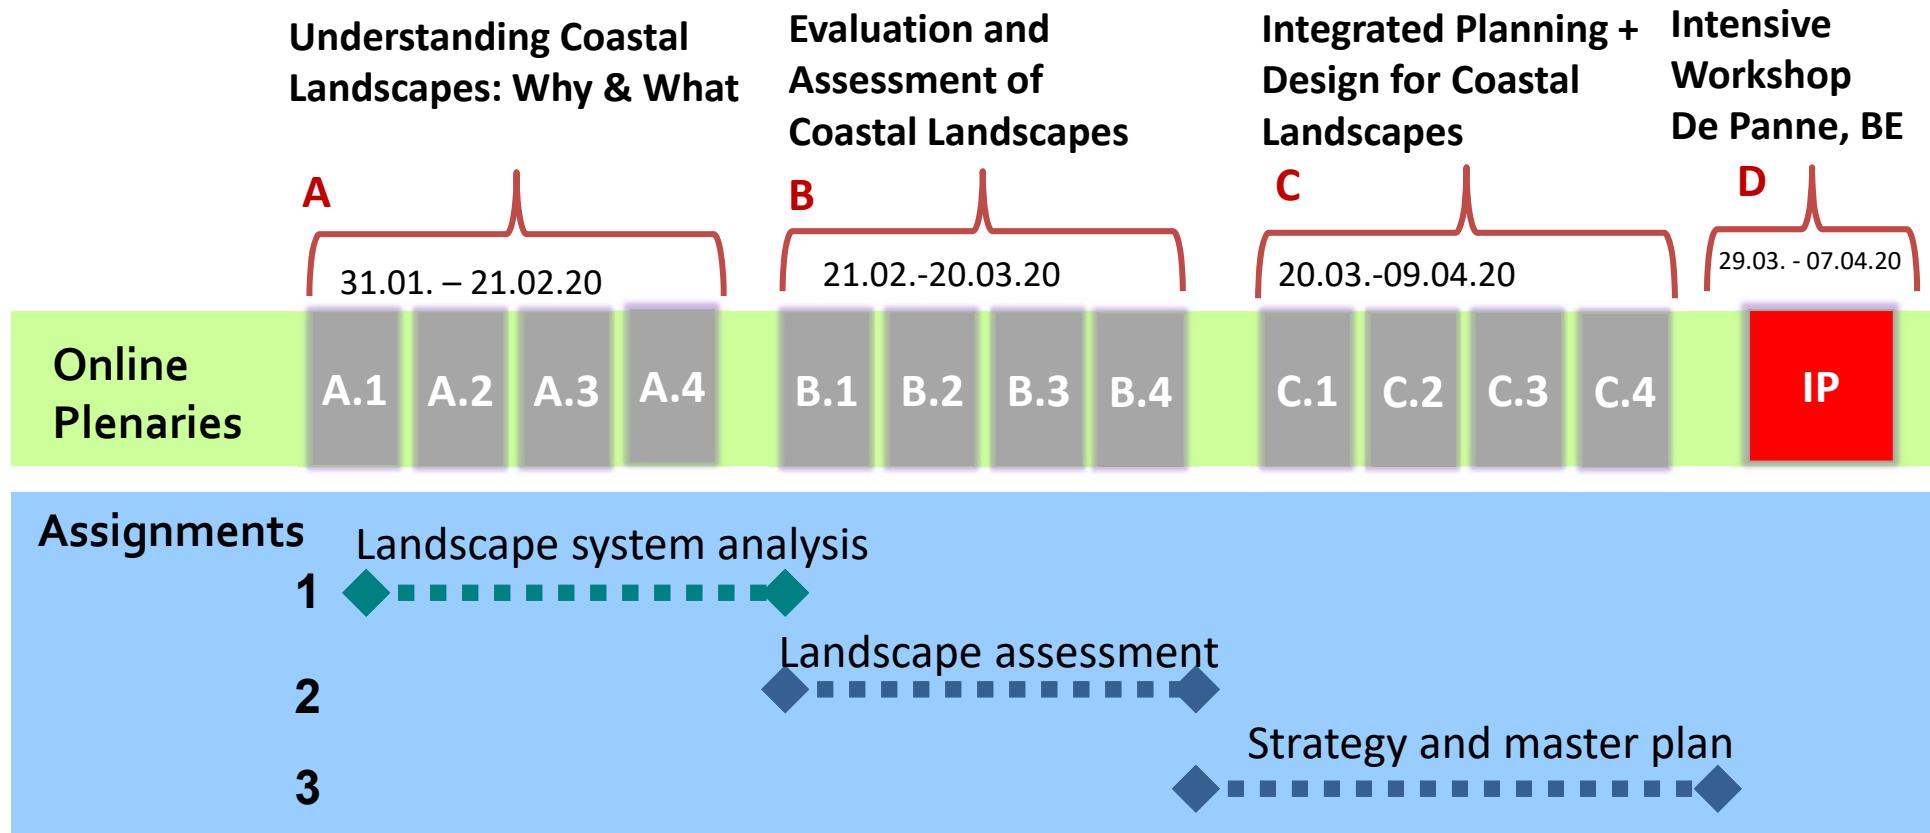

Main CO-LAND Learning Goals

- Understand the **multiple layers** of coastal landscapes
- **Assessing** risks and potentials of a multipolar system
- Prioritize and set **goals**
- Translate your goals into a **strategy**
- **Translate** the strategy to the territory
- **Design and visualise** what it means in the landscape
- **Visioning** new partnerships and value streams

→ you are going to do all of this (quick look at the wiki)

Seminar structure 2020

The class meets on fridays at 15 00 pm CET for 90 minutes

The intensive programme partly covers phase C of the course (strategy + master plan)

DE PANNE Case Study

DE PANNE Case Study - Challenges

Total population 11.000 Inhabitants - Surface 23 km2
Close to the French border - Origins "Duinpan" from dunes
Heritage from WW1
Challenges of rapid urbanisation and natural reserve
How to manage the urban open spaces and keep natural character

T.OP Kustzone territorial development program for the coastal region

DEPARTEMENT
OMGEVING

T.OP Kustzone

- ▶ Active since 2016
- ▶ In collaboration with West-Vlaanderen
- ▶ Focus on climate change, water, demography, coastal dynamics
- ▶ urban/build environment – rural landscapes
- ▶ 19 municipalities, Flemish administrations, stakeholders
- ▶ knowledge building
- ▶ Sharing of knowledge
- ▶ Projects towards implementation

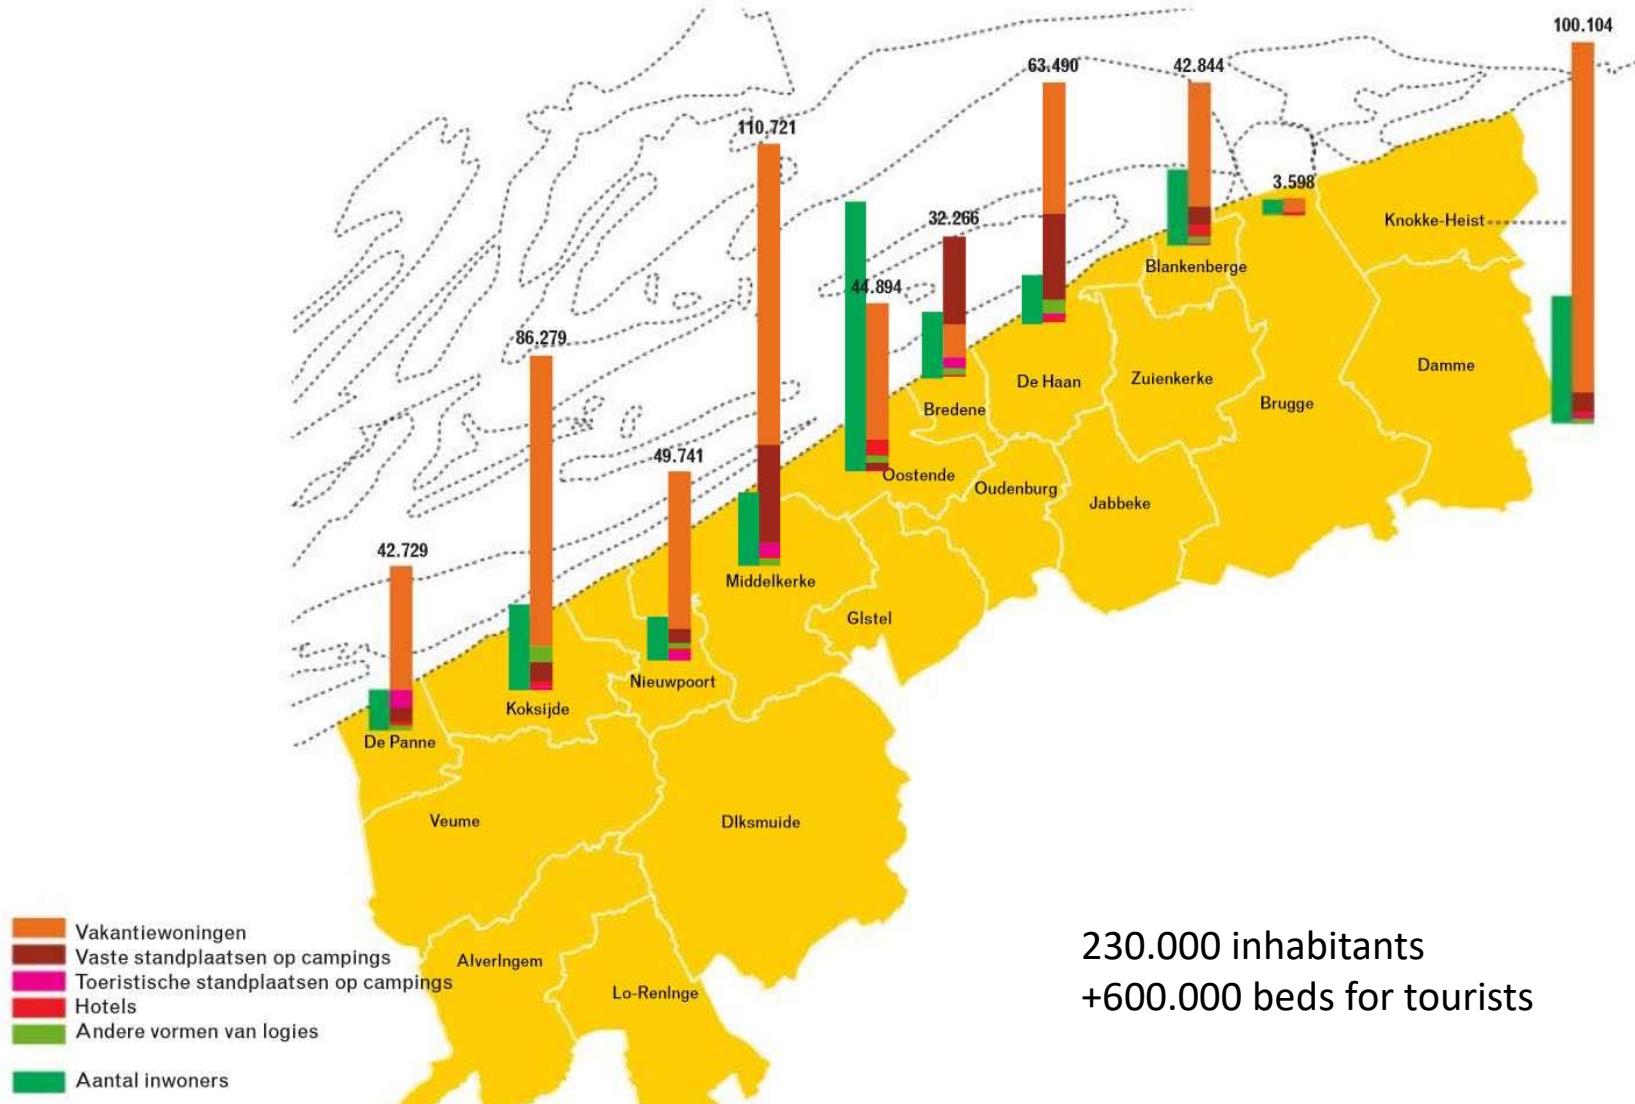

Het studiegebied bestaat uit negentien gemeenten die samen de Vlaamse kustregio vormen.

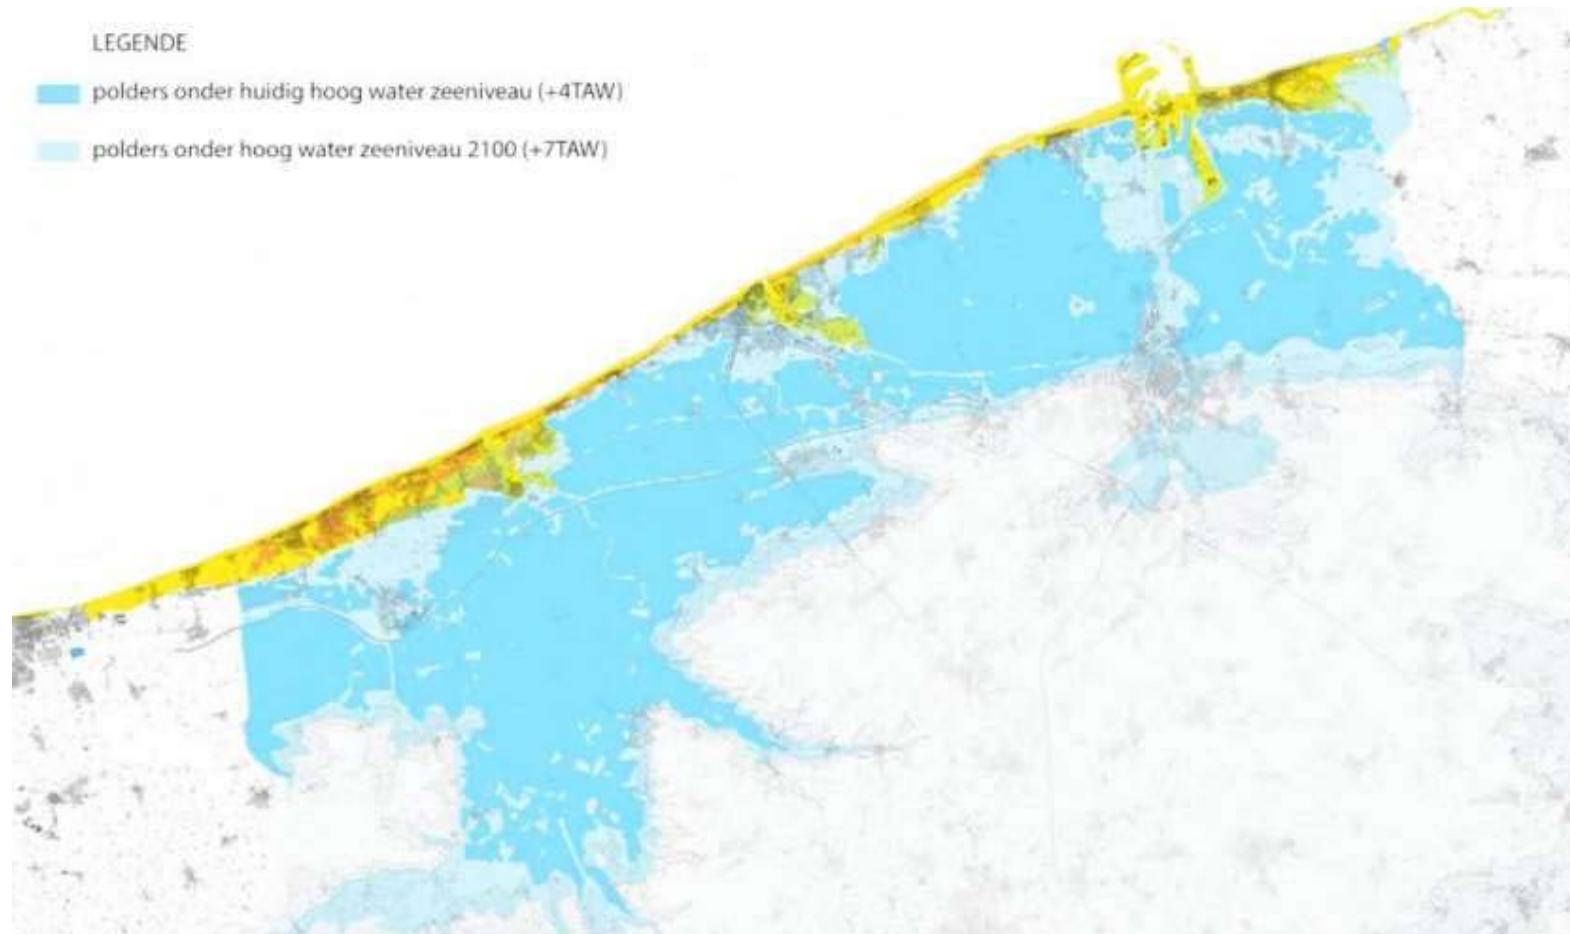

T.OP Kustzone

- ▶ Goal: implementation of long term strategies into local projects
- ▶ Long term strategies: regional scale (Flanders / West-Flanders)
 - No more greenfield developments
 - Accommodate the increase of households in the existing build environment (more compact cities and villages)
 - Deal with an elderly population (care, mobility, services, ...)
 - Adaptation to climate change (water, use of the polders, ...)
- ▶ Local projects:
 - Local challenges: outdated neighbourhoods, a decrease of young people (20-50years), housing market under pressure (tourism)
- ▶ How can regional and local challenges be combined?

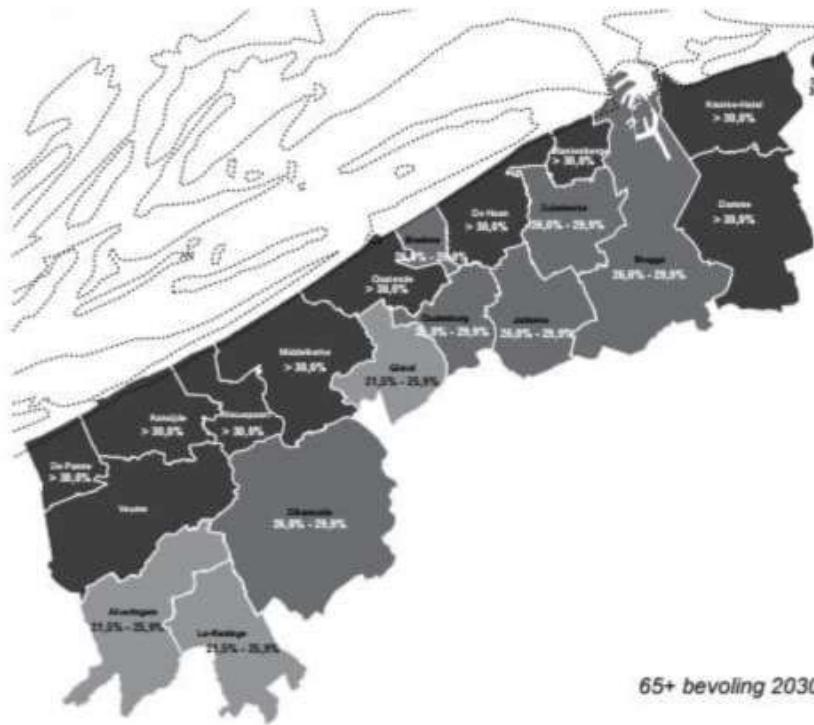

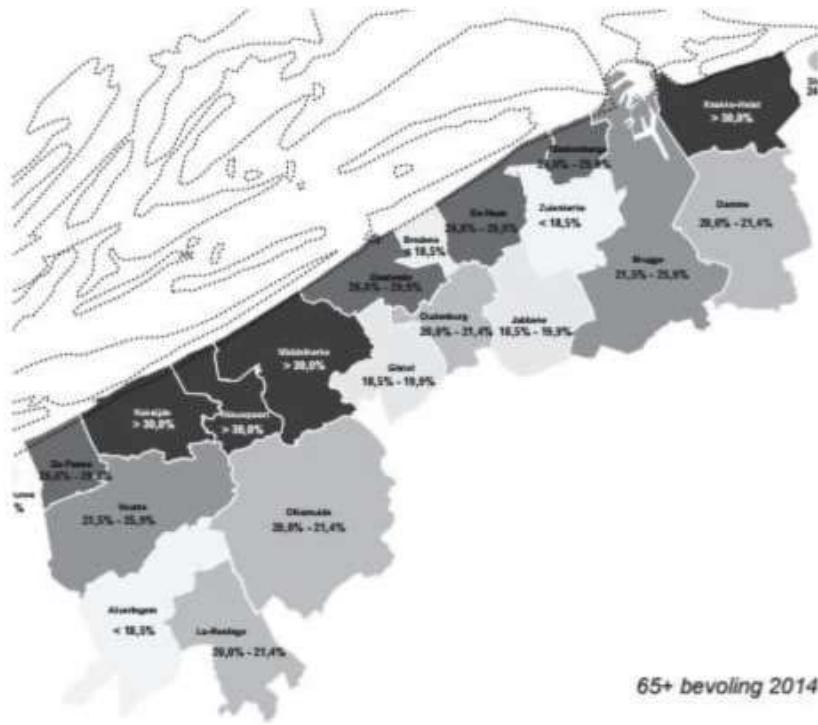

Het studiegebied bestaat uit negentien gemeenten
die samen de Vlaamse kustregio vormen.

Gebieden die kampen met wateroverlast en overstromingsrisico. Bron: Metropolaan Kustlandschap rapport fase 3 deel 2

Tegen 2030 is meer dan 30% van de kustbevolking ouder dan 30 jaar. Heel wat kustgemeenten kennen een stagnatie of zelfs achteruitgang van het aantal bewoners

Vlaanderen
is omgeving

Challenges around De Panne

- ▶ How to restore the natural landscape of dunes / how to connect the different parts / can we restore the typical consecutive parts from the beach, across the dunes and up to the polders
- ▶ Can the village be reconnected to its history / its origin and reclaim its link with the landscape?
- ▶ What can be the future of the polders near De Panne?
- ▶ Can we efface the border (geographically) and strengthen or consolidate both landscapes into one giant landscape of dunes and little villages between Dunkerque and De Panne?

Vlaanderen
is omgeving

Vlaanderen
is omgeving

**Labo Ruimte:
Stedelijk systeem kust**

Potentials and actions

Maintain and protect the rich but weakened kielzone between dunes and polders

Restore or create dynamic dune corridors and interfaces through and around De Panne

Local actions on:
Campsite & holiday facilities
Private house neig.
High rise neig.

**Ecologische kansen voor de randen van
De Panne**

Nieuwe architectuur typologien spelen in op het landschap

Intensive Programme De Panne

Time frame	March 30 - April 6, 2020
Travel on	Sunday, March 29 and Tuesday, April 7
Host	Université Libre de Bruxelles
Location	De Panne, Belgium, North Sea

Next Steps

- Formation of **case study teams**
- Each study programme involved will focus on one case study area along the Belgian coast
- External participants can introduce own cases or work on the Belgian coast
- Teams will be given a **template** on the wiki
- Start research process guided by the **wiki** questions

- **Study** policy references:
https://colandwiki.hfu.de/index.php?title=Reading_List_Coastal_Landscapes

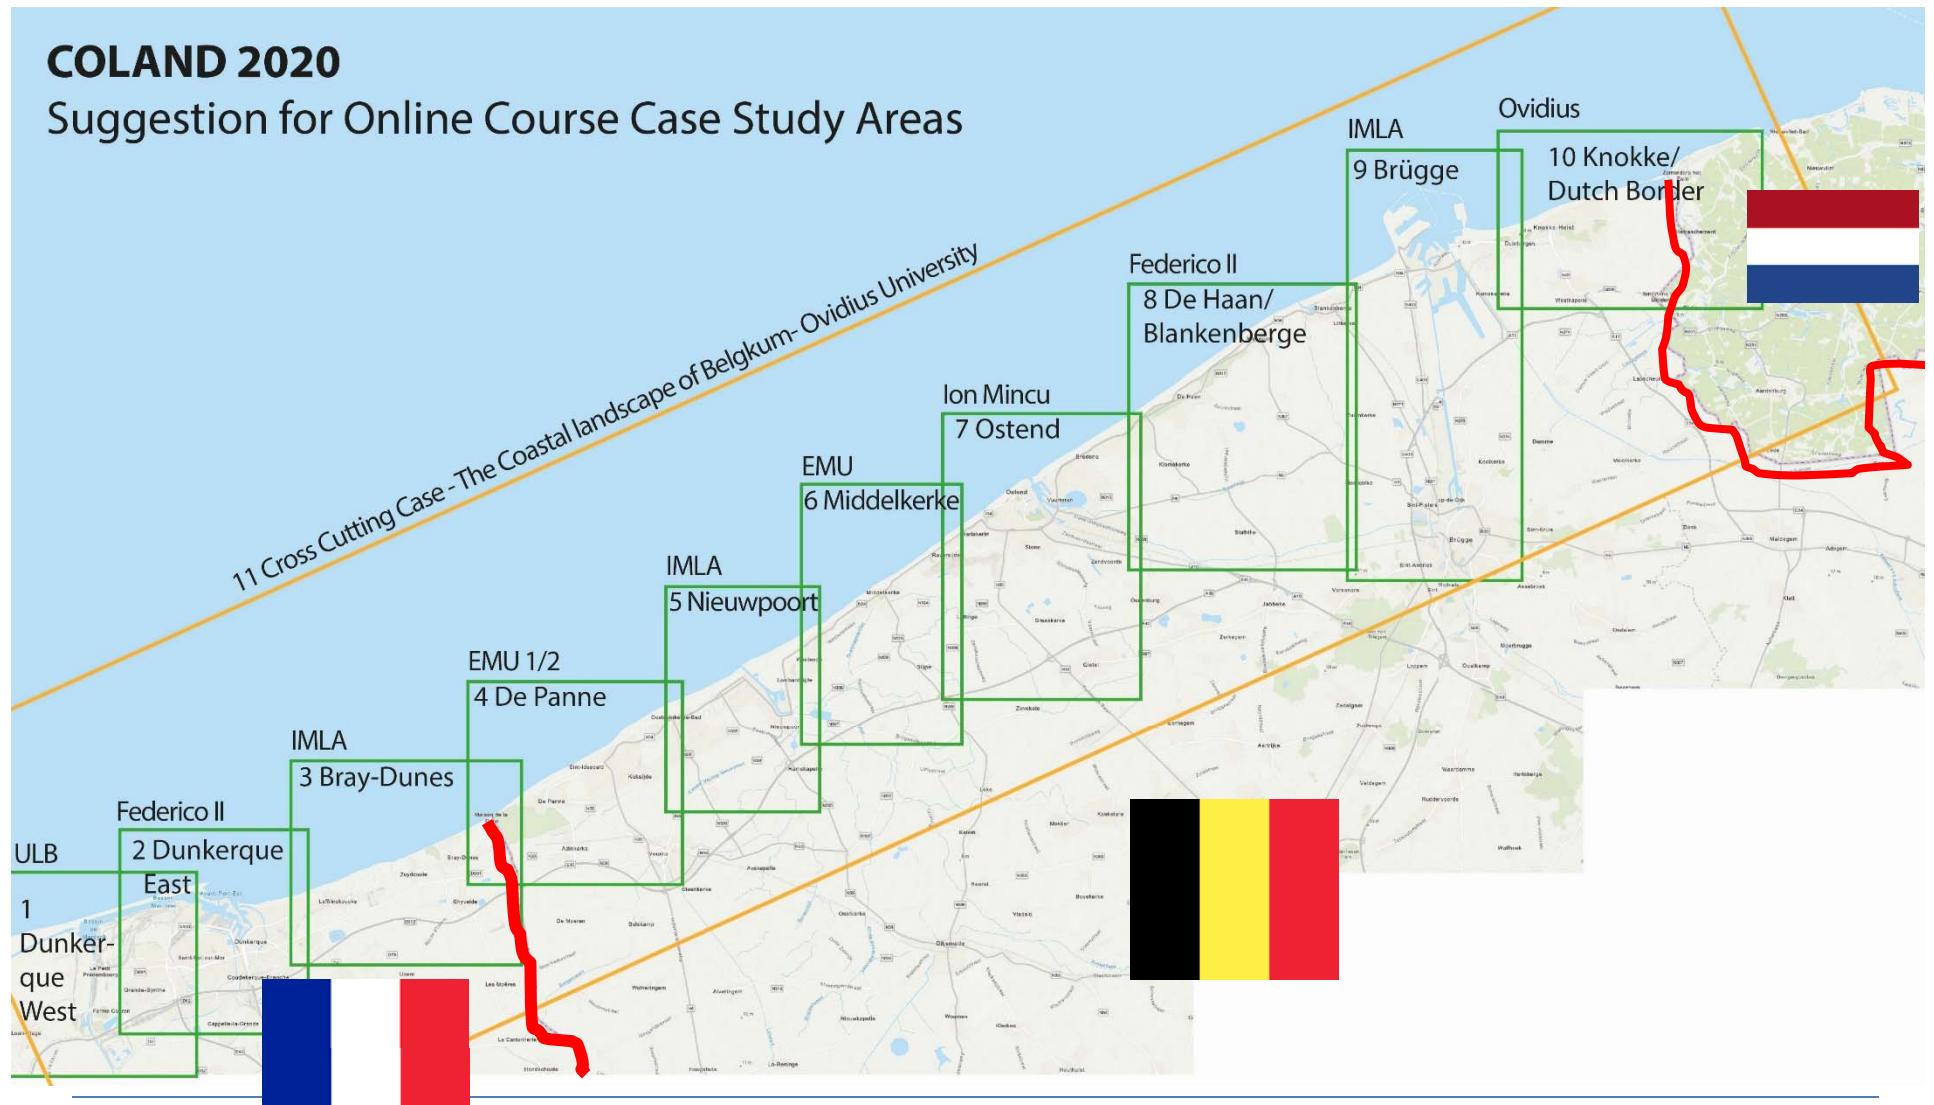

Your first presentation: Friday, February 21, 2020
Focus: Landscape System Analysis

Case study distribution

COLAND 2020

Suggestion for Online Course Case Study Areas

How to find your team?

- Organise yourself in local teams, min 4, max 6 people
- Go to this google spreadsheet:

<https://docs.google.com/spreadsheets/d/1997lcfCVmZfPkXEVrPCNkFz7AVzqAcHYMiURbWfGr0g/edit#gid=0>

- Enter your names to the group until **Tuesday, February 4**
- Seminar coordinator will provide your case study template and account data, then you need to coordinate yourself
- We will leave some room after each Friday session for team work

Resources + Tools

- **Seminar wiki:** Reading list and case study documentation
- **ILIAS:** Lecture recordings, lecture slides and group area for the De Panne Intensive Programme
- **Adobe Connect:** Plenary sessions, group presentations and working space for the groups
- **E-Mail:** Seminar invitations and organisational information

Next meeting

Friday, February 7, 15 pm CET

**Dynamics of Coastal Landscapes
and Drivers for Change**

Our Speakers:

Igor Sirodoev and Natasha Vaidianu

Ovidius University Constanta, Romania

Thank you for your attention
