14 30 – 14 40	COLAND Guidance Report			
14 50 – 15 20	Part 2: Moderated parallel sessions			
Session	A	B	C	D
Topics	Teaching across institutional boundaries	Enhancing meaningful learning in virtual teams	Coastal landscapes as a global challenge	Integrated planning and design for coastal landscapes
Focus questions	What makes institutional cooperation in higher education effective and sustainable? Which supporting structures are needed?	What makes the digital learning environment encouraging and meaningful from the learner's perspective?	What makes coastal landscapes relevant as an educational topic? How can we break the 'grand challenges' down to a concrete landscape context?	How can we bridge planning and design methods? What are the elements and success factors of an integrated process?
Target audiences	University boards and strategy development for HEIs, International office directors, programme directors, students	Higher education teaching staff with interest in digital learning modes, e-learning coordinators, university didactics experts, students	Policy makers, spatial planners and designers, university teachers, students, coastal community members, students	Policy makers, spatial planners and designers, university teachers, students, coastal community members, students
15 20 – 15 30	Short plenary summaries and Outlook
